

Miguel **Fernandez** | Software Engineer | Full-Stack Developer

Miguelfernandez1x1@gmail.com | Venezuela | [Linkedin](#) | +584248351460

Systems Engineer with 4+ years of experience developing and modernizing web and mobile applications. Strong background in JavaScript/TypeScript, React, Vue.js and Angular, with experience in mobile development, REST APIs, microservices, UI/UX and AI-assisted development using Claude and GitHub Copilot.

WORK EXPERIENCE

Development Consultant

Norkut

Venezuela - On-site

Julio 2025 - Present

- **Led the modernization** of Angular and .NET modules, applying Clean Code and SOLID principles and reducing application load time by 10%.
- **Developed an AI-powered** reporting solution integrating the Claude API with Python to reduce manual analysis effort.
- **Redesigned UI/UX** workflows with Figma and implemented QA validations, delivering modules with zero critical defects during formal testing.

Frontend Developer

OMNINEXO - WAIKERI HITECH

Venezuela - Hybrid

February 2024 - April 2025

- **Developed web and mobile applications** using Vue.js and Ionic/Capacitor to support business process digitalization.
- **Implemented real-time inventory data capture**, replacing manual records and improving data accuracy by 20%.

Development Specialist

INSIDE MARKET / RIO SUPERMARKET

Venezuela - On-site

February 2022 - February 2024

- **Developed internal web applications** using Vue.js, supporting payroll management and cash reconciliation processes.
- **Integrated and modified** REST APIs and microservices, consuming services from Vue.js and Kotlin applications and modifying .NET endpoints; validated APIs using Swagger.
- **Participated in requirements gathering**, technical analysis and solution design, using Git, GitHub and GitLab in a collaborative development environment.

EDUCATION

Systems Engineering | Universidad de Margarita (UNIMAR) | Venezuela | 2017-2022

LANGUAGES

Inglés: B1 | **Spanish:** Native

SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, Kotlin, Dart, C#
- **Frontend:** React, Vue.js, Angular, HTML/CSS, Tailwind CSS, Ionic/Capacitor, Flutter, Nuxt
- **Backend & APIs:** Node.js, Express, NestJS, .NET, REST APIs
- **Databases:** MongoDB, SQL Server
- **Tools & Cloud:** Git, GitHub, GitLab, Docker, AWS, Azure, Swagger, Cypress, Figma, CI/CD
